Re: Libby Asbestos Superfund Site
Former Screening Plant Property – Operable Unit 2
Request for Access

Dear Mr. and Mrs. Parker:

We appreciated the opportunity to meet with Mr. Parker in mid-April to discuss the status of the cleanup at the above-referenced property. As you may recall from that meeting, we discussed EPA's need for access to your property to collect activity based samples (ABS) associated with mowing and/or raking scenarios. The purpose of the sample collection is to provide data for a post construction risk assessment to verify that past response actions at the property are protective of human health.

I will be in Libby the week of June 6th and would welcome an opportunity to meet with you if you would like to discuss this sampling effort and our request for access. Please feel free to contact me at (303) 312-6552, or via email at thomas.rebecca@epa.gov if you have any questions concerning this request for access, or if you would like to arrange a meeting the week of the 6th.

In order to conduct our sampling this construction season, ***please sign the enclosed access agreement by June 20th***. If the signed access agreement is not returned by that date, EPA will understand that you refuse to allow access to support the post construction risk assessment.

Sincerely,

A handwritten signature in blue ink, reading "Rebecca J. Thomas", is positioned below the "Sincerely," text.

Consent for Access to Property

Owner Name: Mel and Lerah Parker
Location of Property: 5000 Highway 37 North
Libby, Montana 59923
Relationship to Property: Owner
(owner, tenant, etc.)
Phone: (406) 293-9705

I consent to officers, employees, contractors, and authorized representative of the U.S. Environmental Protection Agency (EPA) and/or the Montana Department of Environmental Quality (MDEQ) entering and having access to our property to collect activity based samples (ABS) associated with mowing and/or raking scenarios. The purpose of the sample collection is to provide data for a post construction risk assessment to verify that past response actions at the property are protective of human health. Sampling will be conducted in the summer of 2011. Activities will be limited to:

- Collection of activity based samples (ABS) associated with mowing and/or raking scenarios.

I realize that these actions by EPA and MDEQ are undertaken pursuant to their response and enforcement responsibilities under the Comprehensive Environmental Response, Compensation, and Liability Act as amended (Superfund), 42 U.S.C. 9601 et seq.

This written permission is given voluntarily with the knowledge of our right to refuse and without threats or promises of any kind.
